EDUCATION

Bachelor Of Computer Application

AtMAMUniversity | 2026
CGPA : 8.2 / 10

SKILLS

- **Languages :**
Python, PHP, Java, C, C++,
JavaScript, C#, SQL, Next JS
- **Frontend :**
HTML5, CSS3, React,
React Native, Tailwind CSS
- **Backend & Database :**
.NET (ASP.NET), FastAPI,
MySQL, PostgreSQL,
phpMyAdmin,
JDBC, Database Design,
- **APIs & Data :**
RESTful APIs, AJAX, JSON,
Postman, LangGraph, LLM
Integration
- **DevOps & Version Control :**
Git, GitHub, Jenkins
- **Concepts :**
OOP, SDLC, AI Model Evaluation,
Prompt Engineering
- **Soft Skills**
Technical Support
Team Leadership

CERTIFICATIONS

HackerRank Certifications

- [Software Engineer](#) (Role Certified)
- [Problem Solving](#) (Intermediate)
- [JavaScript](#) (Intermediate)
- [SQL](#) (Advanced & Basic)
- [CSS](#) (Basic) & [Python](#) (Basic)

KISHAN MARWADI

FULL-STACK DEVELOPER

SUMMARY

BCA graduate with hands-on experience in full-stack development, AI-powered applications, and database design. Built 'AIVOA,' an AI-driven complaint management system using LangGraph and FastAPI. Passionate about clean code and solving real-world problems.

EXPERIENCE

Jun 2026 – Present | Remote

AI Data Annotator | Handshake AI (Project Seal India)

- Craft complex, research-intensive prompts to identify and document AI model failures in web search tasks.
- Develop multi-hop verification workflows using 3+ authoritative sources to ensure factual accuracy.
- Create detailed "Golden Trajectories" documenting step-by-step research methodologies for reproducible fact-verification.

PROJECTS

AIVOA | AI-Powered Complaint Management System

Project | Jul - 2026

- Architected an intelligent complaint processing system using LangGraph and FastAPI with automated data extraction.
- Implemented duplicate detection algorithm using PostgreSQL to maintain QMS ledger integrity.
- Engineered graceful error handling for LLM content-security violations ensuring 100% system uptime.

Tech Stack: Python, FastAPI, LangGraph, PostgreSQL, React.js, REST APIs.

LPFinder (ReuniteFind) — Missing Persons Reporting Platform

Apr 2026 – May 2026

- Architected a full-stack public reporting platform enabling users to browse, report, and track missing persons with a seamless, responsive UI.
- Implemented robust Role-Based Access Control (Finder, Reporter, Admin) with server-side authorization and HTTP-only JWT cookies to ensure strict data ownership and security.
- Designed a normalized PostgreSQL schema using Drizzle ORM and deployed the end-to-end application on Render with a Supabase-hosted database for high availability.

Tech Stack: | Next.js 16 | TypeScript | Tailwind CSS | PostgreSQL

Samaaroh | Full-Stack Wedding Planning Platform

Dec 2025-Mar 2026

- Built hyperlocal B2C wedding platform with normalized 6-table database and RBAC for 3 user types
- Engineered 12-hour booking workflow and 30% advance payment system to prevent vendor scams
- Implemented bcrypt authentication and secure session management to prevent SQL injection/XSS.

Tech Stack: PHP 7+, MySQL, Tailwind CSS, JavaScript, WAMP Server
